CARRIER RATES VS P75

\$93,624

Contracted rates below UCR p75, volume split evenly across carriers.

What this report tells you.

For every code on your fee schedule, we compare what you charge (and what your carriers pay) against the UCR distribution for 02446. Codes paid above the 75th percentile are doing well. Codes below are leaving revenue on the table. The next sections rank where to focus your renegotiation effort.

SECTION 1 • PERCENTILE RANK

Where each fee sits in your ZIP.

Each bar shows your master fee's percentile rank against the local UCR distribution. The vertical line marks the 75th percentile. Fees to the left of the line are below market.

D3330	Endodontic therapy, molar		48th
D4341	Periodontal scaling, four or more teeth		49th

SECTION 2 · TOP 10 BY IMPACT

The codes where the gap costs you the most.

Sorted by annual recoverable revenue (worst-paying carrier per code × annual frequency). These are the codes worth opening a renegotiation conversation about.

CODE	PROCEDURE	FEE	P75	GAP	VOL/YR	ANNUAL
D3330	Endodontic therapy, molar	\$945	\$1,003	\$213	62	\$13,206

SECTION • CARRIER REIMBURSEMENT

Which carrier underpays you most.

Each carrier graded against your local UCR p75, then a code-by-carrier grid of contracted rates as a percentage of p75.

Cigna F \$26,857 pays 76% of p75	UnitedHealthcare F \$22,467 pays 80% of p75	Aetna D \$18,974 pays 83% of p75
Delta C \$13,633 pays 88% of p75	MetLife C \$11,694 pays 90% of p75	

CODE	Cigna	UnitedHealthcare	Aetna	Delta	MetLife
D1110 p75 \$115	83%	85%	89%	91%	93%
D4341 p75 \$295	75%	79%	81%	87%	89%

D2750 p75 \$200	72%	78%	83%	89%	90%

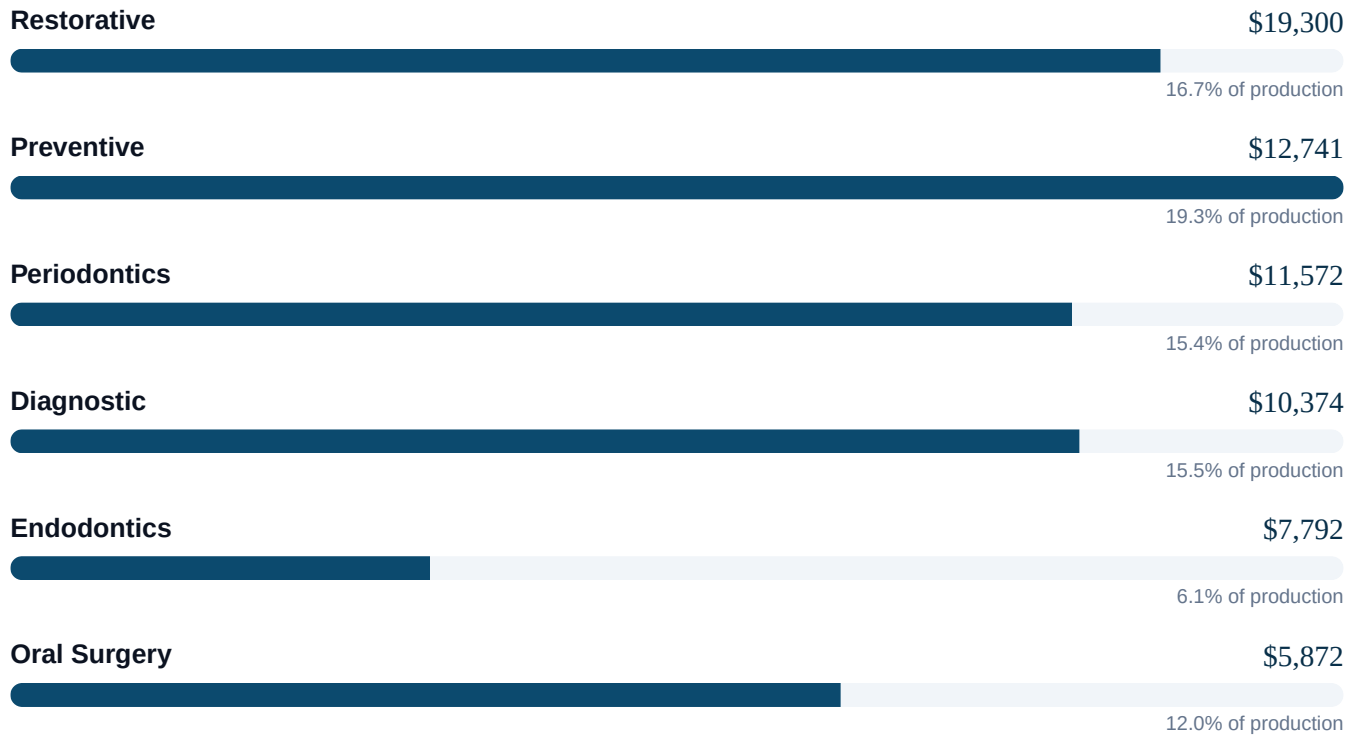

How to use this.

Start with the lowest-grade, highest-volume carrier. On each code where they pay well under p75, ask for the published UCR rate, using any carrier already paying more on that code as your anchor.

SECTION · OPPORTUNITY BY CATEGORY

Opportunity by procedure category.

Recoverable revenue as a share of each category's annual production.

METHODOLOGY

How the numbers were calculated.

UCR (usual, customary, and reasonable) benchmarks are resolved at the most specific geo level available. The first level is your ZIP code: a national benchmark adjusted by a ZIP-level geographic factor. After that come your three-digit ZIP area, metro, state, region, and national. A level is used only when its benchmark rests on at least 30 fees; otherwise the code falls through to the next level. The ZIP-level figure carries the sample size of the national benchmark it is built from.

For each code on your master fee schedule we compute the gap to the local 75th percentile, clamped at zero (codes where you are paid above p75 contribute nothing to recoverable totals). Per-carrier gaps use the carrier's contracted rate for that specific code. We never assume the master fee applies when a carrier-specific rate is missing -- those codes are excluded from that carrier's totals.

Annual recoverable is the per-code gap multiplied by your annual frequency for that code (sourced from your PMS export). The headline is the sum of your own fee's gap to p75 across codes; the per-code clamp is never applied at the aggregate level. Carrier totals use contracted rates instead. We do not know your payer mix, so each code's volume is split evenly across the carriers that list a rate for it.

WORKED EXAMPLE · D4341

Procedure: **Periodontal scaling, four or more teeth**

Your master fee for D4341	\$258
UCR 50th percentile (metro level)	\$262
UCR 75th percentile (target)	\$295
UCR 90th percentile	\$335

WORST-PAYING CARRIER ON THIS CODE: CIGNA

Cigna contracted rate	\$220

Annual frequency	176
Carriers sharing that volume	5
Annual recoverable from Cigna	\$2,640

APPENDIX · CODE-BY-CODE

Every code on your master schedule.

Confidence reflects the geo level used for the benchmark. High confidence = your ZIP, 3-digit ZIP area, or metro. Medium = state. Low = region or national. No-data codes are flagged and excluded from dollar totals.
